

SIMPLEX E-Lab -Hybrid

Intuitive

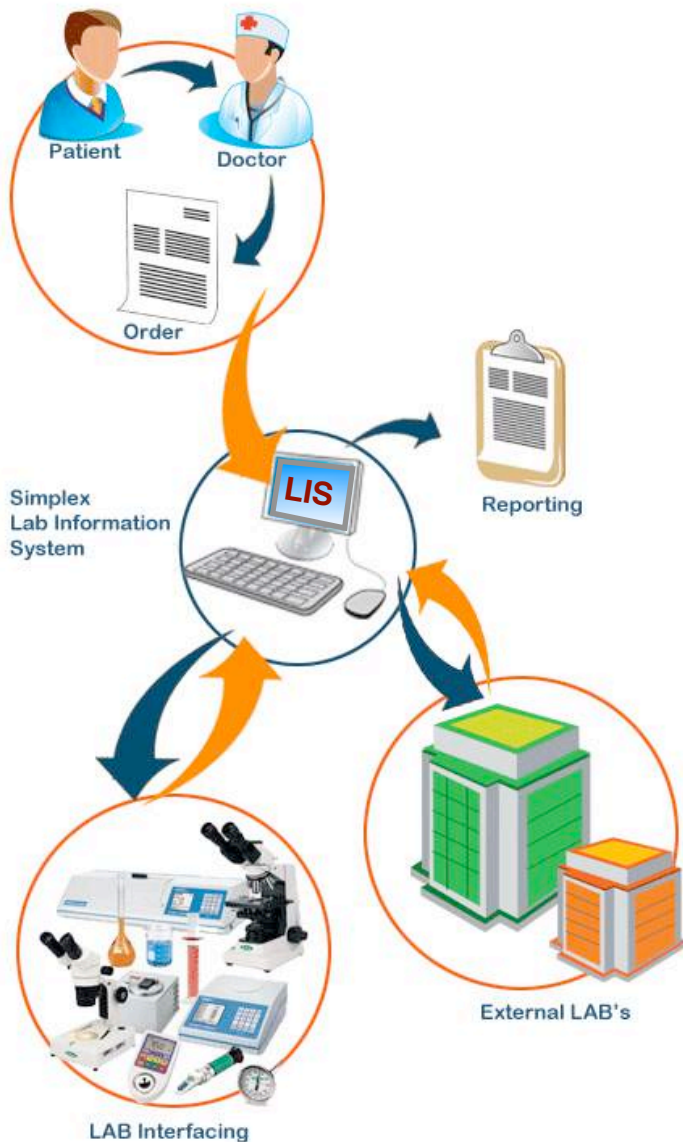

**Clinical Lab
Information System
with Customer Portal**

ROI

Innovative & Integrated solution for the LAB's

Simplex LIS Modules

Insurance & E-Claim

- Detailed Insurance Plans
- Clear information on claim data
- Direct XML generation
- Handling of Remittance and Re-Claim

Management Features

- Measuring T A T
- Sample tracking
- Result Log
- Audit Trail
- QC Data management

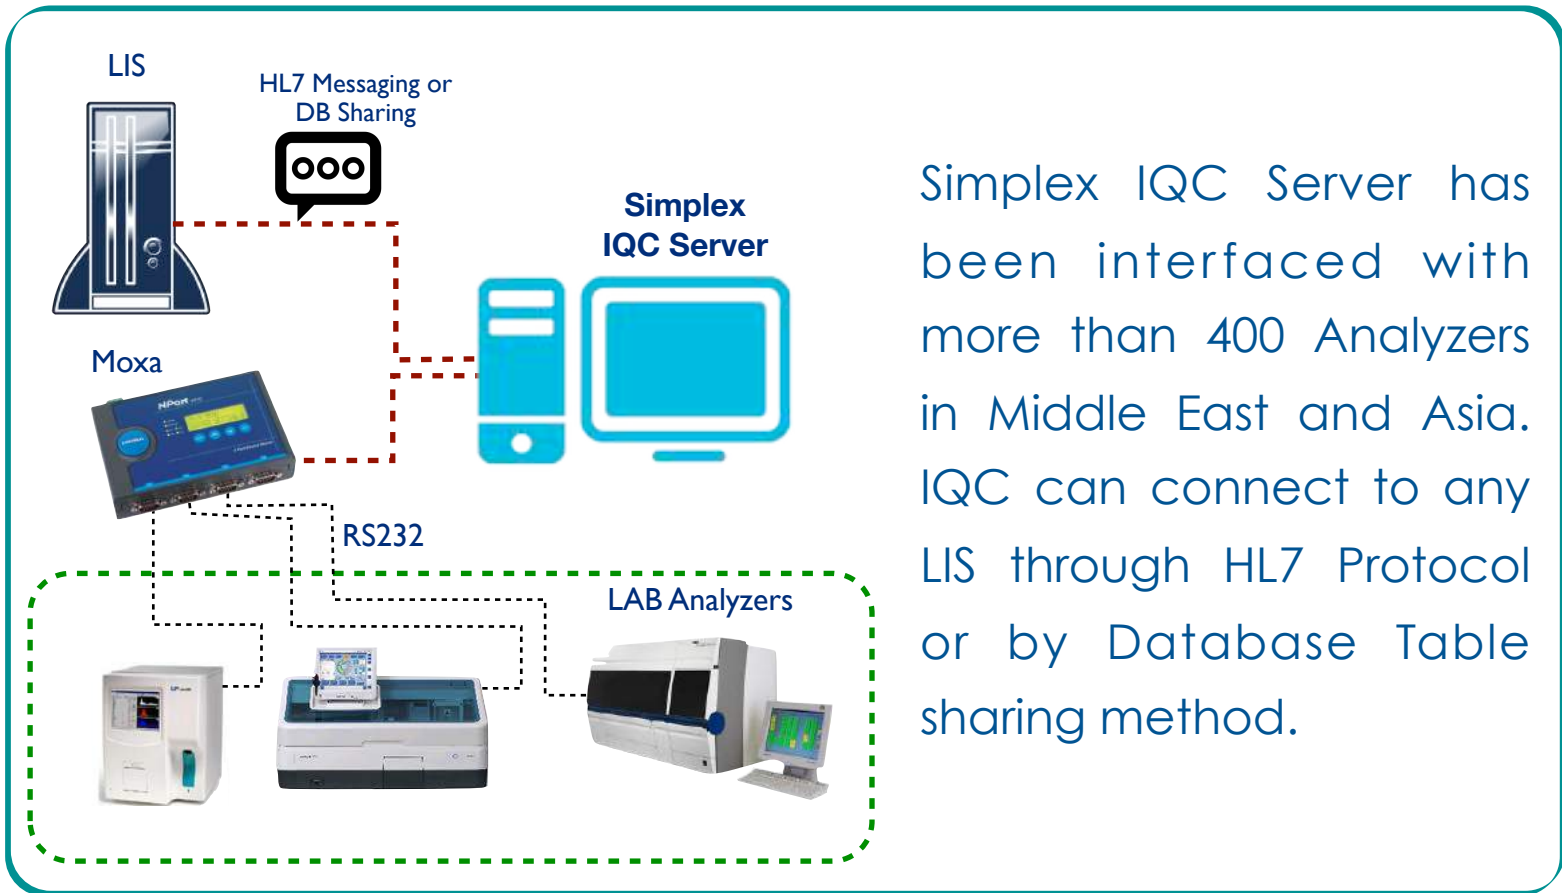

Customer portal

- Order generation
- Barcode Printing
- Order tracking
- Result printing
- Billing report

Simplex IQC Interfacing Server

STREAMLINE AND SIMPLIFY LABORATORY PROCESSES

Simplex IQC Server has been interfaced with more than 400 Analyzers in Middle East and Asia. IQC can connect to any LIS through HL7 Protocol or by Database Table sharing method.

Features Analytical workflow automation –

The solution provides workflow standardization. Analyzer will send in the results automatically to the IQC (Interfacing and QC) Server.

Support for legacy devices –

Plug-in components convert proprietary data to HL7 and provide a standardized interface between legacy analyzer devices and LISs.

Multiple communication options –

Adapters for RS232, or Ethernet allow multiple connectivity options for smooth and easy connectivity between analyzer and information systems.

Quality Control (QC) samples –

The solution handles the data processing and reporting on patient and QC specimens.

Why Choose Us?

One company for Complete HealthCare IT Automation

Hospital Information System

With over 40 Modules cover complete flow including back office, HR, Payroll & Finance.

LAB Information System

Complete LAB automation with Interfacing and QC Modules.

Radiology Information System

Intelligence system with auto scheduling of Radiologists and connection to HIS.

PACS

FDA certified PACS at a very affordable price. Many options to choose from.

Patient CD Publisher

RIMAGE CD publisher automates the printing of patient data and burning of DICOM studies.

HL7 Broker

Connect different platforms and vendors through our HL7 broker.

Analog to DICOM

DICOM conversion for digital pictures, films, Videos from endoscopy or ultrasound systems.

Custom Development

Experts in developing new solutions based on needs and interfacing with other systems.

Quality of success is never an accident it's
always the result of an
INTELLIGENT effort
